Education

Fast National University of Computing & emerging Sciences Karachi

Bachelor of Science in Computer Science

Aug 2022 - June 2026

Technical Profile

Full-Stack Software Engineer with expertise in Software Engineering, Web Development, Generative AI, Data Analytics, and Automation. Experienced in designing, developing, and deploying scalable web applications and intelligent software solutions using modern full-stack technologies, databases, and cloud-integrated architectures. Skilled in integrating AI-driven capabilities, LLMs/RAG, AI pre trained models into real-world applications to enhance functionality and decision-making. Strong foundation in software design, system architecture, database management, testing and debugging, and APIs, with a passion for building high-performance solutions that solve addresses business challenges.

Experience

Data analyst and BI developer

J. Junaid Jamshed Pvt. Ltd. | Jun – Aug 2025

- Developed 8+ interactive **Power BI dashboards** for sales, vendor, and financial reporting to support management decision-making.
- Built financial **reporting dashboards** for the MIS and Finance teams to deliver actionable business insights.
- Implemented **custom DAX measures** and **KPIs** to track key metrics across ERP data sources.

Projects

AI-Based Interview Assistant (FYP) – live at intellihire.com.pk

Python/Flask, React, TypeScript, ChromaDB, LangChain, OpenAI API, SQL, Phpmyadmin, AI/ML,RAG

- Built an AI-powered system to automate candidate screening, generate **evaluation reports**, and enhance hiring decisions through bias-aware analysis.
- Developed a **Retrieval-Augmented Generation (RAG)** pipeline using **LangChain** and **ChromaDB** for context-aware question generation and response evaluation.
- Integrated **MediaPipe** for gaze tracking, head pose estimation, and attention monitoring during interviews.
- Utilized **YOLOv8** object detection models for multiple-person detection, prohibited object detection (e.g., mobile phones), and suspicious activity monitoring.
- Implemented real-time **STT/TTS pipeline(ElevenLabs)**, AI answer evaluation, multi-modal candidate scoring, and AI-driven **proctoring**.

Car Showroom App-Full Stack

Python(Flask), ReactJs, SQL,phpMyAdmin

- Developed a full-stack showroom management system using **Flask**, **ReactJS**, **SQL**, and phpMyAdmin to manage vehicle inventory, customer inquiries, and test-drive bookings.
- Designed and implemented a relational database schema with **normalization**, **primary/foreign key** constraints, **joins**, indexing, and **CRUD** operations to ensure data integrity(**ACID**) and efficient query performance.

Web Crawler

Python(Flask), ReactJs, SQL,phpMyAdmin

- Developed a Python-Flask web crawler using **BeautifulSoup**, **Requests**, and **Pandas** to extract, clean, and process data from websites.
- Stored structured data in **SQL/phpMyAdmin** and built an interactive web interface using frontend technologies for visualization and analysis.

Key Skills

Languages: C/C++, C#(Asp.net), Java, Python, SQL, JavaScript(React)

Software development & AI : OOP, Data Structures , Software Design & Architecture, SDLC & Methodologies, REST APIs, JWT Auth Database Management, SQA, LLMs, RAG, Prompt Engineering, NLP, Generative AI.

Frameworks & Libraries: LangChain, Scikit-learn, NumPy, Pandas, Flask, FASTAPI, Playwright(Testing), Requests, BeautifulSoup(scrapping), SQLAlchemy.

Data: Data cleaning,Database Management, Data Analytics, ETL Pipelines, Data Preprocessing, Dashboards.

Tools: VS Code, Copilot, Git/Github, SQL Server, Power Platforms, Dynamics 365(basics), Jira(AIO tests), n8n.
