Skills

- Database SQL
- Data structures
- OOP
- Project Management
- MS Dynamics 365
- Software Engineering
- Business development
- Data Science/ML
- Software testing

Languages

- Python
- C/C++
- ReactJs
- Html/CSS
- SQL/MongoDB

About Me

Final-year Computer Science student | Full Stack Developer | hands on experience in Software Engineering & Testing | Python | React | SQL | AI & RAG | Dynamics 365 | Business Development

Experience

Internship as Data analyst and BI developer
J. Junaid Jamshed Pvt. Ltd.

Projects

● AI-Based Interview Assistant (FYP) – Ongoing

Python/Flask, React, TypeScript, AI/ML, RAG

Building an AI-powered system to automate initial candidate screening, generate detailed evaluation reports, and enhance hiring decisions through bias-aware and data-driven analysis.

● Car Showroom App-Full Stack

Python(Flask), ReactJs, SQL, phpMyAdmin

Designed a web application for managing vehicle listings, test drives, and customer inquiries for car and bike showrooms.

● Web Crawler

Python(Flask), ReactJs, SQL, phpMyAdmin

Built a Python-Flask-based web crawler to extract and display website data, data cleaning techniques, integrating SQL and front-end technologies.

● FTP-enabled ChatApp

MERN Stack

Built a chat application with real-time messaging and file-sharing features over a simulated FTP connection.

● Contact Management

C++ DSA

Created a digital contact management system with efficient storage, search, and update capabilities.

● MNIST-Neural-Network

Python

Trained a neural network to accurately recognize and classify handwritten digits from the MNIST dataset.

Education

● BS Computer Science

Fast National University of Computing & emerging Sciences
2022 - 2026

● Intermediate

Commecs College
2022

● Matriculation

Falconhouse Grammar School
2020
